APPLICATION NO.	FILING DATE	FIRST NAMED INVENTOR	ATTORNEY DOCKET NO.	CONFIRMATION NO.
09/940,117	08/28/2001	Vincent P. Robibero	132702-0114	3920
50659	7590	06/16/2006	EXAMINER	
BUTZEL LONG DOCKETING DEPARTMENT 100 BLOOMFIELD HILLS PARKWAY SUITE 200 BLOOMFIELD HILLS, MI 48304			VAN BRAMER, JOHN W	
			ART UNIT	PAPER NUMBER
			3622	

DATE MAILED: 06/16/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

<b>Office Action Summary</b>	<b>Application No.</b> 09/940,117	<b>Applicant(s)</b> ROBIBERO, VINCENT P.	
	<b>Examiner</b> John Van Bramer	<b>Art Unit</b> 3622	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 29 March 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 18-35 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 18-35 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Response to Amendment***

1. The amendment dated March 29, 2006 cancelled all previous claims (Claims 1 – 17) therefore no claims were amended. New Claims 18 – 35 were added. Thus, the currently pending claims are Claims 18 – 35.

***Claim Rejections - 35 USC § 101***

2. The 35 USC 101 rejections in the Office Action dated December 29, 2005 are hereby withdrawn because Claims 1 and 5-10 were cancelled.

***Claim Rejections - 35 USC § 112***

3. The 35 USC 112 rejections in the Office Action dated December 29, 2005 are hereby withdrawn because Claims 1 – 10 were cancelled.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 18 – 20, 22 – 25, and 28 – 34 are rejected under 35 U.S.C. 102(e) as being anticipated by Gronemeyer et al. (U.S. Patent Number: 6,363,359).

Claim 18. Gronemeyer discloses an apparatus for using data obtained from remote monitoring of customer, equipment to generate product sales offers to customers comprising:

- a. An input means for receiving parametric data information related to operating parameters of customer equipment being remotely monitored. (Col 2, lines 41 – 57) (The input means disclosed is not the sentinel as asserted in the amendments arguments but rather the mechanism inherently disclosed by the fact that the server receives a response from its query to the sentinel.)
- b. An equipment database storage device connected to said input means for receiving and storing said parametric data information. (Col 5, lines 47-67)

(Gronemeyer references a log file in this section that is transmitted to the server.

The examiner has interpreted this, as presented in context, as a file of records relating to software and hardware on the consumers computer. A database is simply a large collection of organized data. As such, the log file as described is considered a database. In order for the server to perform operations on this database to determine the related products needed by the customer, it must inherently be stored in memory on the server. At a very minimum it would need to be stored in a temporary memory. Additionally, the examiner interprets parametric data to be data relating to parameters, measurements and values upon

which the operation of a device relies. Therefore, information regarding the hardware and software on a computing system, which is included in the log file is parametric data.)

- c. A product database storage device for storing product information related to characteristics of a plurality of products related to the customer equipment, said product information for each said characteristic including a Limit corresponding to a possible value of said parametric data information of an associated one of said operating parameters. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48) (In Col1, lines 29-46 Gronemeyer discloses that a product database and a cross-reference database are obvious improvements that have previously been made in the art. As such, in Col 5, lines 47-67, when the server is describes as having goods and wares separated into different categories that interact with a log file to generates sales offers it inherently contains such databases)
- d. An offer generator means connected to said equipment database storage device and to said product database storage device for comparing a value of said stored parametric data information of a selected one of said operating parameters with at least one of said stored product information limits corresponding to said selected one operating parameter, said offer generator means generating a sales offer for a product associated with said limit directed to the customer associated with the customer equipment when said value and said limit have a predetermined relationship. (Col 3, lines 11 – 35; and Col 5, line 47 through Col 6, line 48) (The applicant asserts that Gronemeyer does not disclose the use of

limits corresponding to possible values of parametric data related to operating parameters for creating offers. However, Gronemeyer specifically discloses the user of parametric data relating to computer hard drives for determining offers that are displayed to a customer)

Claim 19. Gronemeyer discloses the apparatus according to Claim 18 including a customer database storage device connected to said offer generator means for receiving said sales offer and a web server connected to said customer database storage device for sending said sales offer to the customer. (Col 5, line 47 through Col 6, line 48)

Claim 20. Gronemeyer discloses the apparatus according to Claim 19 wherein said web server generates said sales of a on a web page for viewing by the customer. (Col 4, lines 34 – 42)

Claim 22. Gronemeyer discloses the apparatus according to Claim 18 including a customer database storage device connected to said offer generator means for receiving said sales offer, said customer database storage device verifying accuracy of said sales offer against customer information stored in said customer database storage device. (Col 7, lines 56 – 64)

Claim 23. Gronemeyer discloses the apparatus according to Claim 18 including a customer database storage device connected to said offer generator for receiving said sales offer, said customer database storage device using customer information stored therein for transmitting said sales offer to the customer. (Col 7, lines 56 – 64)

Claim 24. Gronemeyer discloses the apparatus according to Claim 18 wherein said input means includes an interface connected to the customer equipment for receiving said parametric data information, a data collector means connected to said equipment database storage device and data transfer means connected between said interface and said data collector means for transferring said parametric data information to said equipment database storage device. (Col 2, lines 41 – 57)

Claim 25. Gronemeyer discloses the apparatus according to Claim 18 wherein the product information includes information about devices and services related to the customer equipment. (Col 2, lines 41 – 57)

Claim 28. Gronemeyer discloses a method of using data obtained from remote monitoring of customer equipment to generate product sales offers, comprising the steps of:

- a. Receiving parametric data information related to an operating parameter of customer equipment being remotely monitored. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)

- b. Storing the parametric data information in an equipment database storage device. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)
- c. Storing in a product database storage device product information related to a characteristic of at least one product including a limit corresponding to a possible value of the parametric data information. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)
- d. Comparing a value of the stored parametric data information with the limit. (Col 1, lines 29-46; Col 3, lines 11 – 35 and Col 5, line 47 through Col 6, line 48)
- e. Generating a sales offer directed to a customer associated with the customer equipment when the value and the limit have a predetermined relationship. (Col 1, lines 29-46; Col 3, lines 11 – 35 and Col 5, line 47 through Col 6, line 48)

Claim 29. Gronemeyer discloses the method according to Claim 28 including a step of storing in a customer database storage device customer information related to the customer and sending the sales offer to the customer based upon the stored customer information. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)

Claim 30. Gronemeyer discloses the method according to Claim 29 including sending the sales offer to the customer by at least one of regular mail, e-mail and a web page. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)

Claim 31. Gronemeyer discloses the method according to Claim 29 including using the customer information to verify, the accuracy of the sales offer. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48) (Since the sales offer sent to the customer is based upon the customer information, the accuracy of the offer in relationship to the customer information is inherently verified)

Claim 32. Gronemeyer discloses the method according to Claim 28 including a step of monitoring the customer equipment to generate the parametric data information. (Col 3, lines 11 – 37; Col 4, lines 25 – 33; and Col 7, lines 31 – 40; and Col 8, lines 11 - 14) (Applicant asserts that Gronemeyer requires a user to interact with websites for the remote monitoring to occur. The cited references disclose the operation of remote monitoring to occur without user intervention.)

Claim 33. Gronemeyer discloses the method according to Claim 28 wherein said step c. is performed by storing in the product database storage device product information related to characteristics of a plurality of devices and services. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)

Claim 34. Gronemeyer discloses the method according to Claim 28 including performing said steps a through b. for a plurality of operating parameters of the customer equipment. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gronemeyer et al. (U.S. Patent Number: 6,363,359) in view of Palme et al (RFC 2557, MIME Encapsulation of Aggregate Documents, such as HTML).

Claim 21: Gronemeyer discloses the apparatus according to claim 2 wherein said web server generates said sales offer as a web page (Col 6, lines 35-48).

However, Gronemeyer does not specifically state that the generated web page is transmitted to the consumer using an email transportation protocol. In the analogous teachings of Palme, a method of encapsulating web pages in email documents is disclosed (Page 1, lines 18-37). It would have been obvious to one having ordinary skill in the art at the time the invention was made to send the generated sales offers via email. One would have been motivated to do so in order

to provide potential customers with a reminder of the offer, in the event that the customer was not ready to make a purchasing decision during the browsing session.

8. Claims 26, 27, and 35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gronemeyer et al. (U.S. Patent Number: 6,363,359).

Claim 26: Gronemeyer discloses the apparatus according to claim 1 wherein data regarding the hard drive capacity and the maximum available storage are gathered in order to facilitate a decision by the system (Col 3, lines 11-37). While Gronemeyer does not specifically state that a threshold is used, it would have been obvious to one having ordinary skill in the art at the time the invention was made to base this decision on a threshold. One would have been motivated to do so because the criteria supplied, hard drive capacity and available storage space, would readily lend themselves to calculating a percentage figure from which the threshold would be determined and a trigger point set. (i.e. Make offer if available storage space is less than 20% of the maximum capacity).

Claim 27: Gronemeyer discloses the apparatus according to claim 1 wherein data regarding the hard drive capacity and the maximum available storage are gathered in order to facilitate a decision by the system (Col 3, lines 11-37). While Gronemeyer does not specifically state that a range is used, it would have been obvious to one having ordinary skill in the art at the time the invention was made to

base this decision on a range. One would have been motivated to do so because the criteria supplied, hard drive capacity and available storage space, would readily lend themselves to calculating a percentage figure from which a range would be established. Any percentage falling within this range would then trigger the generation of an offer. (i.e. Make offer if available storage space is between 5% and 20% of the maximum capacity).

Claim 35. Gronemeyer discloses an apparatus for using data obtained from remote monitoring of customer I equipment to generate product sales offers to customers comprising:

- a. A data collector means for receiving parametric data information related to operating parameters of remotely monitored customer equipment. (Col 2, lines 41 – 57)
- b. An equipment database storage device connected to said data collector means for receiving and storing said parametric data information. (Col 5, lines 47-67)
- c. A product database storage device for storing product information related to characteristics of a plurality of products related to the customer equipment, said product information for each said characteristic including a limit corresponding to a possible value of said parametric data information of an associated one of said operating parameters. (Col 1, lines 29-46 and Col 5, line 47 through Col 6, line 48)

- d. An offer generator means connected to said equipment database storage device and to said product database storage device for comparing a value of said stored parametric data information of a selected one of said operating parameters with at least one of said stored product information limits corresponding to said selected one operating parameter, said offer generator means generating a sales offer for a product associated with said limit directed to the customer associated with the customer equipment when said value and said limit have a predetermined relationship. (Col 3, lines 11 – 35; and Col 5, line 47 through Col 6, line 48)
- e. A customer database storage device connected to said offer generator means for receiving said sales offer. (Col 5, line 47 through Col 6, line 48)
- f. A web server connected to said customer database storage device for sending said sales offer to the customer. (Col 4, lines 34 – 42)

While Gronemeyer does not explicitly state that the remotely monitored equipment includes at least one of an elevator installation and an escalator installation, it is disclosed that the remotely monitored “computing device may be a computer or other intelligent device, such as routers and switches, in addition to consumer devices such as telephones, radios, appliances, etc” (Col 9, lines 1 – 20). The only limitation placed upon such devices is that they are expected to operate in a networked environment. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to monitor elevators and escalators utilizing the invention disclosed by Gronemeyer. One would have been motivated to

do this in order to minimize the time and resources allocated to identifying goods or services needing replacement and support. (Col 1, lines 53 – 59)

***Response to Arguments***

9. Applicant's arguments filed March 29, 2006 have been fully considered but they are not persuasive. The applicant cancelled all previous claims and directed all arguments towards newly presented Claims 18 - 35. As such, the examiner has addressed the arguments during the prosecution and rejection of Claims 18 –35 above.

***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Van Bramer whose telephone number is (571) 272-8198. The examiner can normally be reached on 9am - 5pm Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Eric Stamber can be reached on (571) 272-6724. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
